By extending and enhancing Dynamics with BA Insight Search, sales and support representatives will access information in new and unique ways.

Key Capabilities

1. Automatically search Dynamics, SharePoint, and other enterprise systems to obtain contextual results that are based on currently-viewed information in Dynamics.

2. Quickly link content to a case, opportunity, or contact record.

3. Directly embed compact search results within all common Dynamics CRM objects (i.e. Case, Account, Contact, Opportunity).

4. Provide users with a full screen search center for advanced refinement, instant document preview, and advanced searching capabilities.

5. Have full control over search queries, relevance ranking, refinement and indexed content.

Search for Dynamics enables users to search enterprise-wide content from within Dynamics. Try it for free.
